Blowers (≤2001 Models)

2560-150, Blower: Air with Plug, 120VAC;
Fits Laser, Santana (JWB# J119000)

2560-151, Blower: Air with Plug, 240VAC
50/60Hz, Fits Triton (JWB# S340000), can
replace with 2650-152 Blower below (See Note).

2560-152, Blower: Air with Plug, 240VAC/60Hz,
Fits Pinnacle, Quantum (JWB# R759000)

Note: The 2560-152 Blower can retrofit the 2560-151 Blower with minor modifications. It will be necessary to splice the new 2560-152 Blower to older (defective) 2560-151 Blower plug since they are wired differently. Blowers are for 2001 & Previous Model. Air injection systems were eliminated in 2002.

Optional LED Lighting System

For J-230 Systems (2008+) And J-280/J-270 Systems (2007+)

The Optional LED light assembly has changed from 2007 to 2008, however component part numbers have remained the same as outlined below. Our 2008+ DCU offers a completely enclosed chassis and accepts over-mold light strand connectors for improved moisture resistance. It also retrofits 2007 systems. To retrofit a 2007 DCU to accept our 2008+ LED Light Strands, simply cut the sleeve off their plug and connect. *Note: All new part orders will be shipped with 2008+ components.*

Special Repair Fittings

Repair Fittings	Fixes	Installation Procedure		
<i>Slips Over Fitting O.D.</i>  <i>Street or Spigot End</i> #6000-355, 1.5" lines #6000-356, 2.0" lines Fitting fixes leaky glue joints between leaky slice valves, tees, or elbows and mating Sch 40 PVC pipes. Fittings glue over outer diameter (O.D.) of leaking fittings to bypass leak in pipe connection.	  	 1. Cut leaky pipe at end of fitting as shown.	 2. Test repair fitting fit over mating fitting body (*light sanding may be required to facilitate fit.) Clean both fittings, then glue repair fitting over mating fitting end as shown following glue manufacturer instructions.	 3. Clean mating pipe coupling and repair fitting ends. Glue coupling over spigot end of repair fitting as shown following glue manufacturer instructions. Allow glue to dry BEFORE applying pressure!
<i>To Sch 40 Pipe I.D.</i>  <i>Street or Spigot End</i> #6000-357, 1.5" lines #6000-358, 2.0" lines Fittings permit replacement of leaky slice valve without replacing mating fittings. They glue directly into mating fittings after leaky valve is cut out, using their remaining rigid pipe I.D as a sealing surface. They then provide new pipe ends for the replacement slice valve.		 1. Cut out leaky slice valve, tee, or elbow from mating fittings as shown.	 2. Clean repair and mating fitting ends. Glue repair fitting ends into mating fittings following glue manufacturer instructions.	 3. Glue new slice valve onto each repair fitting spigot end following glue manufacturer instructions. Allow glue to dry BEFORE applying pressure!
Repair Couplings	Joins	Installation Procedure		
<i>To Sch 40 Pipe I.D.</i>  <i>To Sch 40 Pipe I.D.</i> #6000-350, 1.5" lines #6000-351, 2.0" lines Couplings join two Sch 40 PVC pipes together in locations where there is insufficient space for an outside fitting.	 Joins 2 Sch 40 PVC Pipe Ends	 1. Clean coupling ends and inner surface of mating pipes.	 2. Glue coupling into mating pipe ends following glue manufacturer instructions.	 3. Allow glue to dry BEFORE applying pressure!

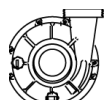

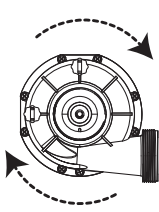

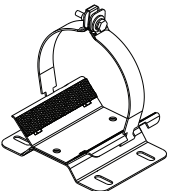

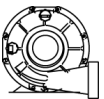

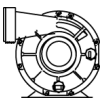

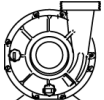

2002+ Pump History Matrix (North America 60Hz)

This matrix lists all pump changes that have occurred over the past few years and outlines their transition from fixed bracket to our current universal bracket mounting design. All fixed bracket mount pumps have a specific head rotation. Our current universal pumps however are fully adjustable to many head angles by rotating the entire pump assembly in the mounting bracket. It is important to note that current universal pumps require a special mounting bracket (purchased separately below).

J-460 Synthetic Wood Skirt Panels (2006)

Note: Panels are shipped flat. They are designed to bend around corners when installed.

REQUIRED ORDERING INFORMATION

- To ensure proper panel fit when ordering, you **MUST** measure the existing panel and include the dimensions on your order.
- When ordering synthetic cabinet panels, you must add a color code to the end of each panel number using the codes listed at right. For example, if you order part number XXXX-XXXB, you will receive an item in the Harvest Wheat color. Failure to add the color code will delay your order

REQUIRED COLOR CODE

G = Coastal/Silverwood

B = Harvest Wheat

R = Sierra/Autumn Red

REQUIRED ORDERING INFORMATION	REQUIRED COLOR CODE
1. To ensure proper panel fit when ordering, you MUST measure the existing panel and include the dimensions on your order.	B = Harvest Wheat (Blonde)
2. When ordering synthetic cabinet panels, you must add a color code to the end of each panel number using the codes listed at right. For example, if you order part number XXXX-XXXB, you will receive an item in the Harvest Wheat color. <u>Failure to add the color code will delay your order.</u>	R = Sierra/Autumn (Red)
	G = Coastal/Silverwood (Gray)
	M = Roasted Chestnut (Mahogany)
